

Green Art - bringing art galleries to all available spaces

- Green Art is a unique project which aims at showcasing works of promising Polish and global artists to the greatest number of recipients;
- Any user can visit a digital version of a selected museum or an art gallery through the Green Art internet portal;
- The portal contains pictures, photographs and other forms of art freely available for any interested entity;
- The tridimensional visualizations and the opportunity of seeing the works in augmented reality empower aesthetic sensations and zest the reception of the pieces of art;

- A virtual museum can be a valuable educational aid and can be beneficial for disabled people who cannot leave their houses;
- Green Art project also cooperates with art galleries and individual recipients in terms of designing and establishing augmented reality exhibitions and openings in all kinds of facilities;
- Any indoor space can be mapped and transformed into a private art gallery through the use of virtual reality headsets.
