

HPEMG – A special self-developed mat placed on the vehicle's way allowing its unconditional stop

Advantages:

- Portable device (supported by two operators)
- Time of operational preparation: approximately 3 minutes
- Possibility of remote activating in order to make way for other vehicles
- Possibility of cooperation with the drone which after tracking a proper air vehicle remotely activates the mat at the right time

Application:

- The Army
- Police
- Border guards
- Special forces
